Windows Server Monitoring and Automated Cloud Backup from Meals Plus

Windows Server Monitoring and Automated Cloud Backup services are designed to ensure that data is safe and keep Meals Plus fully functional, so you can tend to the important stuff.

With **Server Monitoring** your server will be:

    a) Monitored by Meals Plus IT Team, which holds multiple certifications from Microsoft and other vendors

    b) Monitored 24 hours per day, 7 days a week, 365 days per year

    c) Monitored automatically with electronic alerts

    d) Monitored for

        i) Disk Space Utilization

        ii) CPU Performance

        iii) Hardware failure: Hard Drives, processor, NIC cards, power supplies

        iv) Service alerts associated with SQL, SQL Agent, Meals Plus, and others

        v) SQL maintenance (backup) plan execution

        vi) SQL Performance alerts

        vii) Server uptime

        viii) Windows OS update management

        ix) Microsoft SQL updates

    e) Updated monthly with the latest Microsoft updates and a server report will be compiled and delivered by the Meals Plus IT Staff

With **Cloud Based Backup** you get:

    a) Automated Data Backup, via cloud based server

    b) Selected database backed up daily

    c) Peace of mind that your data is protected

    d) Monitoring of the successful completion of backup tasks by the Meals Plus IT Team and in the event of a disaster, assistance in the retrieval and recovery of lost data

Prices for the services are as follows:

    Server Monitoring - $795.00 per quarter, per server, billed quarterly

    Cloud Based Backup - $295.00 per quarter, per server, billed quarterly
